

Columbus

Casing - in Machine

SALIENT FEATURES

- The Columbus Casing-in is a well co-ordinated ,compact single blade design with double roller adhesive coater on either sides to apply cold glue uniformly on the end paper of the book block
- The book block emerges between the rollers for even application of glue,while the case is positioned for the book block to get inserted in to the case and delivering a hard bound block
- Also suitable for end paper pasting for soft cover books
- The mechine design incorporates the ability to handle small, medium and special size of books
- The formats can easily changed with out any adjustments
